## **[EnerNETMob Handbook on e- mobility](#)**

[EnerNETMob Electromobility Handbook](#)

Within the scope of the EnerNETMob project, the project partners have tested and improved the Sustainable Electromobility Plans based on common standards and low carbon policies and have set up the “Interregional Electromobility Network” crossing cities located in the transnational MED area.

Have a look at the EnerNETMob Electromobility Handbook and read about the reasons to choose electric transport, the current status of electric transport and the results of the the EnerNETmob project.
