[EnerNetMob - 1st training package](#)

Date of Production:

22 Jun 2021

Topic:

Public and stakeholder involvement

Urban mobility planning

EnerNETMob is an Integrated project of the Interreg-MED Programme that has 3 phases: studying, testing and capitalization phase.

The project promotes policy recommendations and holistic SEMP (Sustainable Electromobility Plans) that can be adopted by Member States.

The training package content involves:

1. Video on electromobility
2. Guidelines with Best Available Technologies (BATs) and Technical standards to be used for charging infrastructures and ICT tools
3. Planning model to develop “Sustainable Electro-Mobility Plans” with common indicators and procedures
4. Global report of partners Local Framework Analysis on Electro-mobility and Energy Supply State of Art according to regulation analysis and common planning guidelines
